## **64 Audio makes its tubeless technology even more attainable with the launch of three all-new custom in-ear monitors.**

*64 Audio unveils the A6t, A4t, and A3e custom in-ear monitors, two of which feature the company's patent-pending tubeless tia™ technology. All three models can be customized and ordered at [www.64audio.com](http://www.64audio.com) and 64 Audio retailers starting June 7th, 2018.*

**June 7th, 2018** - 64 Audio, the leader in custom and universal-fit in-ear monitors, today launched 3 new custom models for musicians and audiophiles: the A6t (\$1299), A4t (\$999), and A3e (\$699). Each model has a unique sound signature, allowing musicians and audiophiles to choose a model that caters to their musical tastes.

Headlining for the A6t and A4t is tia, a technology exclusive to 64 Audio that works by eliminating sound-altering tubes and dampers. Sound produced by the tia system is able to disperse freely and effortlessly, yielding an incredibly smooth and musical frequency response. The A6t and A4t feature two major elements of the tia system: the tia high driver and the tia single bore design.

*"This is a significant launch for us. It represents the culmination of some very hard work by our R&D and Engineering teams to bring a technology that was once available only in our flagship products into virtually our entire lineup. I've been wanting to do this for a long time and I'm thrilled that we can make it available to even more musicians and audiophiles out there."*

- Vitaliy Belonozhko, Founder and Chief Sound Designer

### **A3e Details**

The A3e is an extremely versatile IEM with impressive clarity and warmth for any instrument or genre. With its neutral and balanced tuning, the A3e delivers a surprisingly transparent and musical sound ideal for musicians and music lovers alike. This 3-driver earphone features LID (Linear Impedance Design), a technology exclusive to 64 Audio that ensures a consistent frequency response regardless of the source, perfect for musicians plugging into a variety of equipment.

### **A4t Details**

Building off of 64 Audio's popular 4-driver design, the A4t is the company's entry into its proprietary tia technology, delivering exceptionally lifelike clarity and musicality. Its balanced sound signature makes it the perfect fit for just about any genre.

### **A6t Details**

The "in-ear monitor of choice" for touring musicians and discerning music lovers, the A6t features tia and LID to greatly improve its popular 6-driver predecessor. Featuring a full and detailed sound signature that brings out the warmth and musicality in any live mix or recording, the A6t is ideal for musicians and audiophiles looking for added accuracy and resolution.

### **apex™ Technology and 3D Fit™**

All 3 models also feature 64 Audio's patent-pending apex (Air Pressure Exchange) Technology, a pneumatically interactive vent that dramatically reduces listening fatigue by releasing sound pressure that is inherent in earphone designs. 3D Fit is 64 Audio's proprietary 3D printing process that results in a personalized fit not found in any other IEM.

### **About 64 Audio**

64 Audio was founded by Vitaliy Belonozhko, a sound engineer who has been working with musicians and production companies for over a decade. He discovered the advantages of IEMs over traditional floor "wedges" and recognized that a better solution to in-ear monitoring was needed. Today, with a staff of over 70 people and a team of some of the best minds, 64 Audio has become the most innovative in-ear monitor manufacturer in the industry, supplying products worldwide and to some of the best-known bands and engineers in the world. With new and unrivaled technologies such as apex, LID, and tia, 64 Audio excels in challenging traditional earphone designs to bring-to-market unique and innovative audio products.
